Highlights of SeekiNF Features and Databases: SeekiNF is an incredible search engine to search for both financial and non-financial information. Currently, we have the SEC Filings along with various sections such as: **MD&As, Footnotes, Exhibits, Conference Calls, Press releases, Stockholders Letters, Item 1A, and PCAOB Reports.** These documents are pre-processed and made available on the Cloud for efficient and effective search. **Under custom service, which is free to subscribers, we can provide specific footnotes, Items, and specific paragraphs containing certain key words or phrases, and perform textual analysis on these segments and filings including Readability Indices, Risk Sentiments (Financial Risk, Litigation Risk, Tax Risk, Idiosyncratic Risk, and Systematic Risk), Tone Dispersion, and Cosine and Vector Measures of Similarity (Vector Similarity based on a published paper by Srivastava in JETA).**
